

COMMUNITY NURSING BLADDER ASSESSMENT

Surname: weewrwer

DOB: 2022-11-03

First Name: werwe

Sex: Male

Referred By: werwewer

Presenting Problems:

Gradual increased Urine and faecal incontinence during the day and at night in the background of vascular dementia, CVA stroke and other related co-morbidities. Prompt use of toilet during the day has been successful in the past, however, recently Russell has been having more 'accidents' when prompted to use the toilet therefore requiring increased use of continence aids. Currently on molicare 10 drops pull ups with changes being attended every 2-3 hours thus increased use of continence aids.
